

# VERSATILITY IS THE KEY

## INTRODUCING ARENA BLADE TECHNOLOGY

*The arena blades lift the entire surface profile without gouging into the arena base material, providing consistent footing for your horse*

**GREMLIN 1850**

Arena Pro™ products offer a range of accessories that add to the functionality of your new arena implement. Ripper teeth are an optional extra that allow you to break up hard packed surfaces that would otherwise be difficult to work.

The leveling blade comes standard with all DB and TPL models will fill in hollows and will spread sand evenly over your arena.

This adds value to your new implement.

It can do so much more than just keep your arena looking and feeling great. Your new Arena Pro™ implement can keep your gravel driveway or car park maintained and repair wash outs, prepare seed beds, spread soil and maintain tracks. One tool to do a multitude of jobs quickly, giving you more time to ride!

At Arena Pro™ we are dedicated to find innovative solutions to help you spend less time working and give you more time to enjoy the things that matter.
